Madison Street Reconstruction

Welcome

Welcome to the public information meeting for the proposed reconstruction of Madison Street from Doty Street to the South Branch of the Rock River in the City of Waupun, Dodge County and Fond du Lac County.

Your attendance and interest in the project are appreciated. The meeting will be held in an open-house format with a brief presentation at 5:45 pm. This handout and the exhibits on display are available to help familiarize you with the project details. We encourage you to review the exhibits. Representatives from the City of Waupun and Gremmer & Associates, Inc. (design consultant) are here to receive comments and answer questions.

Project information

The purpose of the project is to replace the deteriorating pavement and underground utilities.

The proposed project consists of reconstructing the existing roadway, curb and gutter, sidewalk, driveways, sanitary sewer, storm sewer and water main from Doty Street to the South Branch of the Rock River. In addition, sanitary sewer and water main will be reconstructed from south of Libby Street to Doty Street with sidewalk added on the east side of Madison Street.

The City of Waupun may be special assessing for 50% of the replacement cost of sidewalk along the length of adjacent properties. Additional details on the special assessment associated with the sidewalk will be provided by the City of Waupun in the future.

Homeowners interested in replacing their sanitary sewer lateral or constructing a new storm sewer connection as part of this project may arrange to do so at their expense. If interested, please contact the City of Waupun or Gremmer & Associates, Inc. to discuss further.

Construction of the project will occur between March and November, 2019. It is anticipated that work north of STH 49 will be completed by August 2, 2019 to accommodate the Waupun Truck-n-Show. Homeowners will be notified of the construction schedule once it becomes available.

Traffic during construction

Madison Street will be closed to through traffic during construction. Unfortunately, there will be times during construction where the residential properties will not have access to their driveways, and need to park their vehicles on an adjacent side street. Residents will be notified in advance of these operations. Residents will be provided with the contact information for the construction project engineer, and will be given greater detail on the contractor's schedule prior to commencement of the work.

Right-of-way

No right-of-way acquisition is anticipated for the project at this time. However, the contractor will need to work on private property to flatten driveway slopes or to blend back slopes behind the sidewalk.

Public comments

We encourage you to talk to the City representatives and the design engineers to share your comments, and ask them any questions you may have. A "comment form" is also attached to this handout for your convenience, and may be returned to the registration table or returned by mail as noted on the form. We ask that all comments be returned by Wednesday, December 12th, 2018.

For more information, please contact Jeff Daane, Director of Public Works, at (920) 324-7918 or jeff@cityofwaupun.org
